Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
---	----------------

<ul style="list-style-type: none"> Vpis v prvi letnik študijskega programa. Študent mora pred izpitom pripraviti in predstaviti ter zagovarjati projektno seminarsko nalogu. 	<ul style="list-style-type: none"> A prerequisite for inclusion is enrolment in the first year of study. Student has to prepare, present and defend a project seminar before the exam.
--	--

Vsebina:	Content (Syllabus outline):
<ul style="list-style-type: none"> <i>Uvod</i> Osnovni pojmi in definicije: tehnologija, proizvodnja, obdelovalni proces, obdelovalni sistem, računalniško integrirana proizvodnja (CIM), proizvodno integrirani meritni sistemi, regulacijski krogi (zanke) kakovosti. <i>Sodobne tehnologije in sistemi preoblikovanja</i> Osnovna načela preoblikovanja in razvrstitev preoblikovalnih postopkov. 	<ul style="list-style-type: none"> <i>Introduction</i> Basic concepts and definitions: technology, production, manufacturing process, manufacturing system, computer integrated manufacturing (CIM), production integrated measuring systems, quality control circuits (loops). <i>Modern forming technologies and systems</i> Basic principles of forming and classification of forming processes.

<p>Značilni postopki preoblikovanja. Sodobni preoblikovalni stroji in sistemi.</p> <ul style="list-style-type: none"> • <i>Sodobne tehnologije in sistemi odrezovanja</i> Osnove rezanja, razdelitev in značilnost postopkov. Postopki z vrtilnim glavnim gibanjem. Postopki s premočrtnim glavnim gibanjem. Abrazivni postopki obdelave. Sodobni obdelovalni stroji in sistemi. • <i>Sodobne tehnologije in sistemi spajanja</i> Razdelitev postopkov spajanja. Osnovni postopki varjenja, spajkanja in lepljenja. Mehanski postopki spajanja. • <i>Nekonvencionalne tehnologije in sistemi</i> Razdelitev in značilnost postopkov. Kombinirani postopki. • <i>Implementacija načel trajnostnega razvoja v izdelovalnih tehnologijah.</i> 	<p>Typical forming processes. Modern forming machines and systems.</p> <ul style="list-style-type: none"> • <i>Modern cutting technologies and systems</i> Basics of cutting, classification and characteristics of cutting processes. Processes with rotational primary movement. Processes with translatory primary movement. Abrasive machining processes. Modern machine tools and systems. • <i>Modern joining technologies and systems</i> Classification of joining processes. Basic welding, soldering and gluing processes. Mechanical joining processes. • <i>Nonconventional technologies and systems</i> Classification and characteristics of processes. Combined processes. • <i>Implementation of the principles of sustainable development in manufacturing technologies.</i>

<p>Cilji in kompetence:</p> <p><i>Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:</i></p> <ul style="list-style-type: none"> • sposobnost samostojnega spremeljanja in kritične presoje najnovejših dosežkov s področja strojništva in širše, • sposobnost samostojnega raziskovalno-razvojnega dela na področju strojništva, • sposobnost razumevanja, analize, sinteze in uporabe teoretičnih in aplikativnih znanj o sodobnih izdelovalnih tehnologijah in sistemih, • sposobnost aktivnega reševanja problemov na področju izdelovalnih tehnologij v delovnem okolju, • seznanitev s sodobnimi razvojno-raziskovalnimi metodami in procesi za učinkovito uveljavljanje proizvodnih tehnologij v strojništvu, • sposobnost prenosa znanja s področja sodobnih izdelovalnih tehnologij v proizvodne organizacije, • sposobnost timskega dela s strokovnjaki z različnih področij, • sposobnost učinkovite uporabe informacijsko-komunikacijske tehnologije, • seznanitev z načeli trajnostnega razvoja pri izdelovalnih tehnologijah. 	<p>Objectives and competences:</p> <p><i>The learning unit mainly contributes to the development of the following general and specific competences:</i></p> <ul style="list-style-type: none"> • ability to independently monitor and critically assess the latest achievements in the field of mechanical engineering and beyond, • ability of independent R&D work in the field of mechanical engineering, • ability to understand, analyze, synthesize and apply theoretical and applied knowledge of modern manufacturing technologies and systems, • ability to actively solve problems in the field of manufacturing technologies in the work environment, • acquaintance with modern R&D methods and processes for the effective implementation of production technologies in mechanical engineering, • ability to transfer knowledge from the field of modern manufacturing technologies to production organizations, • ability to work in teams with experts from different fields, • ability to effectively use information and communication technology, • acquaintance with the principles of sustainable development in manufacturing technologies.
<p>Predvideni študijski rezultati:</p> <p>Študent/študentka:</p> <ul style="list-style-type: none"> • pozna osnovne pojme povezane s proizvodnjo in nastajanjem izdelka, • spozna sodobne tende v proizvodnih tehnologijah, • spozna sodobne konvencionalne in nekonvencionalne postopke obdelave, ki so prisotni v sodobnem industrijskem okolju, • razume, obvlada in zna predstaviti teoretične in strokovne pojme in znanja 	<p>Intended learning outcomes:</p> <p>Student:</p> <ul style="list-style-type: none"> • knows the basic concepts related to the production and creation of the product, • learns about modern trends in production technologies, • learns about modern conventional and unconventional manufacturing processes that are present in the modern industrial environment, • understands, masters and is able to present theoretical and professional concepts and knowledge for individual

<p>za posamezne primere izdelovalnih tehnologij in sistemov,</p> <ul style="list-style-type: none"> • obvlada ustrezena metoda in tehnike za učinkovito uporabo različnih izdelovalnih tehnologij v praksi, • spozna in razume načela trajnostnega razvoja pri izdelovalnih tehnologijah v strojništvu. 	<p>examples of manufacturing technologies and systems,</p> <ul style="list-style-type: none"> • masters appropriate methods and techniques for the effective use of various manufacturing technologies in practice, • learns and understands the principles of sustainable development in manufacturing technologies in mechanical engineering.
---	---

Metode poučevanja in učenja:

- *predavanja* z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov),
- *avditorne vaje*: reševanje problemov, študije primerov, kritično presojanje, diskusija, refleksija izkušenj, vrednotenje, projektno delo, timsko delo,
- *laboratorijske vaje*: laboratorijske vaje ter ogledi proizvodnih tehnologij v uspešnih podjetij v JV regiji.
- *seminar*: priprava, predstavitev in uspešen zagovor projektne/raziskovalne naloge, (reševanje problemov, študije primera, kritično presojanje, diskusija, refleksija izkušenj, vrednotenje, projektno delo, timsko delo).

Learning and teaching methods:

- *lectures* with active student participation (explanation, discussion, questions, examples, problem solving),
- *tutorial*: problem solving, case studies, methods of critical thinking, discussion, reflection of experience, evaluation, project work, team work,
- *laboratory work*: laboratory exercises and visits to production technologies in successful companies in the SE region.
- *seminar tutorial*: presentation and defence of project/research work (problem solving studies, critical thinking, discussion, reflection of experience, evaluation, project work, team work).
